## Languages

Turkish

English

## Summary

I've done a couple of front-end jobs with React. A business site is on the road which has a Rails BackEnd and React FrontEnd. Got solid knowledge of Vanilla JavaScript and currently a student at Microverse, on the road to be a **Full-Stack Developer**. Also, have a solid foundation in math.

## Skill Highlights

- JavaScript
- React, Redux, jQuery
- Algorithms and Data Structures
- Git and GitHub
- HTML and CSS
- Remote Pair Programming
- Team Work
- Matlab
- Ruby and Rails

## Experience

### Technical Support Engineer - 10/2020 to Still

- Controlling the students' pull requests for given instructions.
- Give them the necessary feedbacks to achieve mastery on the topic.

### Freelance Web Developer - 03/2020 to Still

- One business site has been created from the beginning.
- Open source contributions are being added to the [GitHub](#) society.

### Project Engineer - 04/2017 to 12/2017

#### Helios Enerji Yatırım Tic. A.Ş., Istanbul

- 60 MW solar plant has been constructed.
- Worked on a 20 million dollars + project, general coordination, and project disquisitions
- Project end.

### R&D Staff - 09/2014 to 10/2015

#### Tubitak Project (213M511), Istanbul

- 700 mAh/g current and more than 50 cycles of lithium batteries were produced.
- All design has been made by me.
- The documentation is written by me for the morphological and electrical tests.

## Education

---

Online School: **Full-Stack Web Development** - 2020
